EDUCATION

Boston University

College of Arts and Sciences

Pure & Applied Mathematics

Sept 2015 - May 2019

WORK EXPERIENCE

SOFTWARE ENGINEER

Resilient Coders   Mar 2022 - Present

- Collaborated with other developers to create web applications where we focused on team collaboration, debugging issues, and meeting deadlines.
- Managed and maintained my previous projects by utilizing GitHub for all projects.
- Prioritized and organized my work to build fully responsive websites that can be displayed and interacted with on all platforms.

  Projects:
  - To-do List: A user can add tasks to a list and each item can be crossed out, removed, and counted. I used CSS, Node.js, EJS and MongoDB
  - Boba Ordering System: A user must log in to access the order form/orders. The user can check off whether the order has been completed or not. This web app utilizes CRUD operations.
  - Full-Stack Project: A platform to store all of the listings from the user's apartment search. The user(s) can add additional information about the apartments (broker contact info, pros, cons, commute)

MANUFACTURING TECHNICIAN

Vericel Corporation   May 2021 - Mar 2022

- Adhered to strict cGMP and GDP guidelines while following SOP.
- Used an electronic batch record system to keep meticulous track of procedures.
- Worked collaboratively with colleagues to efficiently complete tasks and provide a safe lab environment.

MARTIAL ARTS INSTRUCTOR

HeartShare Human Services of New York   Sept 2019 - Apr 2019

- Taught Taekwondo at an after-school program run by a nonprofit for underserved communities in New York City.
- Created five lesson plans every week and ran a disciplined classroom with children ranging from ages 6 to 13.
- Built rapport and maintained communication with students and parents

OPERATIONS SUPERVISOR

Agganis Arena   Sept 2016 - Sept 2019

- Created and applied innovative procedures that cut hockey to concert arena conversions by 1-2 hours per shift
